

Chlamydia

My Name: Aliyah Simmons

Date: 9/30/16

The Practitioner I saw today:

Carol Stewart, CRNP

Ramona Lazenby, CRNP

What is Chlamydia?

A sexually transmitted disease (STD) caused by a tiny germ. It is passed from one person to another during sex. If not treated, it can cause serious damage.

How Do I Keep From Getting It Again?

1. Use Condoms every time during sex!!!
2. Have your partner(s) treated!
3. Do not have sex until you have been rechecked after treatment!

What are the Symptoms?

- Women and men may not have any symptoms and still be infected
- Men may have pain with urination or a discharge from the penis
- Women may have a vaginal discharge
- Burning and itching in or near the vagina
- May have pain in the genital area
- There may be bleeding between periods

What Medicines Will Help?
Is There Another Treatment?

Azithromycin 500mg
2 tablets at 1 time!

Remember...

1. USE CONDOMS EVERY TIME!
2. Have your partner(s) treated also!
3. Take medication as instructed!

Do I need a follow-up appointment?

☒ yes, in _____ days
6 weeks if positive

Date: _____

Time: _____
