COMMENTS: FASTING:NO

Test Name	In Range	Out Of Range	Reference Range	Lab
HELICOBACTER PYLORI, UREA BREATH TEST	NOT DETECTED		NOT DETECTED	AT

Antimicrobials, proton pump inhibitors, and bismuth preparations are known to suppress H. pylori, and ingestion of these prior to H. pylori diagnostic testing may lead to false negative results. If clinically indicated, the test may be repeated on a new specimen obtained two weeks after discontinuing treatment. However, a positive result is still clinically valid.
