User's Guide for Travelers

Quick Reference for Do's and Don't's on Back Panel

Usually one capsule is taken every other day for 4 weeks. Take one hour before a meal. Swallow capsule as directed. Do not take it with warm or hot liquid. Replace any broken capsules. If you are inactive, your course of treatment should be completed.

A mild fever may occur. If these symptoms continue or if the following effects occur: breathing or swallowing difficulties, dizziness, tiredness. If you notice other effects not listed above, contact your doctor.

Do not take this medication if you have the following conditions: illness, infection, allergies, or are pregnant. Do not use during pregnancy only if clearly needed. Discuss this medication appears in breast milk. Consult your doctor.

Do not take this medication with any other over-the-counter or prescription medication you may take, including birth control pills, immunosuppressants, sulfa drugs, antibiotics, other drugs, or alcohol. Consult your doctor or pharmacist approval.

Call your local poison control center or emergency room immediately. In the U.S. call 1-800-222-1222. Canadian residents should call their local poison control center.

Be careful in preventing typhoid fever, depending partly on the degree of contact or ingestion of potentially contaminated food or water.

Take as remembered; do not take it if it is near the time for the next dose. Do not miss your usual dosing schedule. If you miss more than one dose, do not "double-up" the dose to catch up.

STORAGE: Store capsules under refrigeration at all times as directed. Keep away from heat and light. Do not store in the bathroom.

Instructions for taking Doxycycline

Take one pill every day. Begin two days before departure;
continue during stay and for 4 weeks after return.
