CHIEF COMPLAINT: Anxiety

Symptoms: Has history of anxiety. Does not feel depressed. Unable to focus. Unable to sleep. Difficulty with concentrating. Having panic attacks. Works, getting married and transitioning.

Patient reports that he was molested from age 7-14. Patient reports being very feminine growing up and during his adult life and was bullied in school (middle and high school) and on jobs.

Patient reports that the fiancé is a high functioning autistic person and he is dealing with emotional issues with his fiancé.

Patient reports having some relationship issues with his fiancé. He reports dressing up and looking more feminine but recently stopped and his fiancé is not very understanding of this change. Patient reports his fiancé making negative comments "you look like a hard core man" and patient reminds him that he is a man. Patient reports this is a 3 year relationship and his fiancé understood this in the beginning but is not very understanding at this time.

Patient reports that it is very difficult to work 60+ hours per week and maintain dressing up and applying make-up daily. He reports that his fiancé does not drive so he has to do everything, take care of errands, and take care of the household. He reports feeling overwhelmed with his relationship and work.

Patient reports that his appetite is not good (eats maybe once or twice a day). Patient reports that he is having difficulty sleeping also.

Other: Denies suicidal or homicidal thoughts.
