Right Care. Right Place.

COBB, LARRY <E1002793> MS
ID 3670752 Quarcoo, Robert
CL 2/26/2021 8:11 AM DOB 4/9/1991

COVID-19 Molecule

Name:

Date of visit:

You had a **Positive** COVID-19 test today. You are directed to isolate and care for yourself at home unless you have a worsening of symptoms. If you have worsening symptoms please call 911 or go to the nearest ER. Please notify your close contacts and the possible need for COVID-19 testing.

You may discontinue home isolation under the following conditions:

- At least **24 hours** have passed since resolution of fever without the use of fever-reducing medications **and** improvement in respiratory symptoms (e.g., cough, shortness of breath); **and**,
- At least **10 days** have passed since symptoms first appeared.
- For persons who never develop symptoms, isolation and other precautions can be discontinued 10 days after the date of their first positive test

For Service

Job Title:

Vitals

- Temp 99.2 (F)
- HR 64 (b/min)
- BP 112/68 (mm Hg)
- Oxygen sat 97 (%)
- RR 16 (b/min)
- Ht 5'5 (cm)
- Wt 150 (kg)
- BMI 24.2 (Index)
- Ht-cm 190.50 (cm)

Allergies

- Shellfish-derived Products (Active)

Today's Diagnoses Include

- Z20.828 Exposure to COVID-19 virus

Notes:

If this test is positive you are to SELF-QUARANTINE for 10 days after symptom onset and resolution of fever for at least 24 hours, without the use of fever-reducing medications, and with improvement of other symptoms. If you do not have symptoms you will need to quarantine for 10 days from this test. Close contacts of COVID positive people also need to quarantine for 10 days even with a negative test. If you develop severe breathing problems or shortness of breath, please call 911. We are seeing that the symptoms of COVID-19 are worsening in the second week of illness and this can be when people experience shortness of breath or end up needing ER care.

Please continue to stay hydrated and rest. You can take over the counter medications for symptom control.

COVID-19 Rapid Molecular

NAME	VALUE	REFERENCE RANGE
F COVID-19 Molecular	Positive A	Negative

This test has not been FDA cleared or approved. This test has been authorized by FDA under an EUA for use by authorized laboratories. This test has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens; and This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection and diagnosis of COVID-19 under section 564(b)(1) of the Act, 21 U.S.C. 360bbb-3(c)(1), unless the authorization is terminated or revoked sooner.

Results are for the identification of SARS-CoV-2 RNA. The SARS-CoV-2 RNA is generally detectable in respiratory samples during the acute phase of infection. Positive results are indicative of the presence of SARS-CoV-2 RNA; clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status. Positive results do not rule out bacterial infection or co-infection with other viruses. Negative results must be combined with clinical observations, patient history, and epidemiological information necessary for patient management, should be treated as presumptive and, if inconsistent with clinical signs and symptoms, should be tested with an alternative molecular assay. Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for patient management. Negative results should be considered in the context of a patient's recent exposures, history, present clinical signs and symptoms consistent with COVID-19.
