STATUS: FINAL

<u>Test Name</u>	<u>Abnormal</u>	<u>Result Value</u>	<u>Unit of Measure</u>	<u>Ref Range</u>	<u>Status</u>	<u>Producer ID</u>
SARS COV 2 AB IGG	A	POSITIVE			F	AT

Reference range: Negative

This test is intended for use as an aid in identifying individuals with an adaptive immune response to SARS-CoV-2, indicating recent or prior infection. Results are for the detection of SARS-CoV-2 antibodies. IgG antibodies to SARS-CoV-2 are generally detectable in blood several days after initial infection, although the duration of time antibodies are present post-infection is not well characterized. At this time, it is unknown for how long antibodies persist following infection and if the presence of antibodies confers protective immunity. Individuals may have detectable virus by molecular testing present for several weeks following seroconversion. Negative results do not preclude acute SARS-CoV-2 infection. This test should not be used to diagnose acute SARS-CoV-2 infection. If acute infection is suspected, direct testing by molecular methods for SARS-CoV-2 is necessary. False positive results for the test may occur due to cross-reactivity from pre-existing antibodies or other possible causes.

Please review the "Fact Sheets" available for health care providers and patients using the following websites:
[QuestDiagnostics.com/home/Covid-19/HCP/antibody/fact-sheet1](https://www.questdiagnostics.com/home/Covid-19/HCP/antibody/fact-sheet1)
[QuestDiagnostics.com/home/Covid-19/Patients/antibody/fact-sheet1](https://www.questdiagnostics.com/home/Covid-19/Patients/antibody/fact-sheet1)

This test has been authorized by the FDA under an Emergency Use Authorization (EUA) for use by authorized laboratories. The FDA authorized labeling is available on the Quest Diagnostics website:
www.questdiagnostics.com/Covid19.
