| RESULT:          |                 | Mixed genital flora isolated. These superficial bacteria are not indicative of a urinary tract infection. No further organism identification is warranted on this specimen. If clinically indicated, recollect clean-catch, mid-stream urine and transfer immediately to Urine Culture Transport Tube. |                        |                  | F             | AT                 |
