

Pulmonary Function Test

THORNE, MATTHEW RICHARD - E000634039

* Final Report *

Result type: Pulmonary Function Test
Result date: November 30, 2022 16:25 CST
Result status: Auth (Verified)
Result title: PFT4
Performed by: Vyas, Priyanka A, MD on November 30, 2022 16:25 CST
Verified by: Vyas, Priyanka A, MD on December 01, 2022 7:22 CST
Encounter info: E2232201576, Baptist East, Outpatient, 11/28/2022 - 11/28/2022
Contributor system: LANIER

PFT4

EAST PULMONARY FUNCTION TEST

PATIENT VERIFICATION DATA:

THORNE, MATTHEW RICHARD - 2232201576

ENTER DICTATED BY AND NAME OF PHYSICIAN EXTENDER IF APPLICABLE
HERE (NOT USED FOR RESIDENTS):

DATE OF STUDY:

11/28/2022

ORDERING PHYSICIAN:

Lindsey Barton, Nurse Practitioner

INTERPRETATION:

The patient showed good effort. Flow volume loop is of good quality.

Spirometry: FEV1 to FVC ratio is 0.68, which is reduced. FEV1 is 3.96 L, 93% predicted, which is normal. FVC is 5.83 L, 104% predicted, which is normal. Post bronchodilator, FEV1 to FVC ratio normalized to 0.73. FEV1 has remarkably improved to 4.54 L, which is an improvement by 15%. FVC improved to 6.21 L, which is an improvement by 7%.

Lung volumes: TLC is 6.62 L, 86% predicted, which is normal.

Diffusion: Unadjusted DLCO for hemoglobin is 33.3 mL/minute per mmHg, 99% predicted, which is normal.

IMPRESSION:

1. Initial spirometry showed mild airflow obstruction.

The patient has shown significant response to bronchodilators

THORNE, MATTHEW RICHARD - E000634039

- with complete resolution of airflow obstruction.
2. No restrictive physiology.
 3. Normal gas transfer.
