Encounter Reason/Date	Cardiac Evaluation and Management Followup: Bicuspid aortic valve Followup: Aortic valve stenosis Followup: Aortic valve regurgitation Followup: Mitral valve regurgitation 10/30/2023 - 10:30AM - MCA East
Problems	Reviewed Problems • Malignant melanoma - Onset: 10/30/2023 • Aortic valve stenosis - Onset: 12/07/2021 • Body mass index 30+ - obesity - Onset: 12/07/2021 • Mitral valve regurgitation - Onset: 04/15/2021 • Bicuspid aortic valve - Onset: 06/07/2021 • Aortic valve regurgitation - Onset: 04/15/2021 • Hyperlipidemia - 08/2023 TC 141; TG 353; HDL 23; LDL 52 • Essential hypertension
History of Present Illness	Mr. Gerry Smith is a 60 year old patient who returns for evaluation and management of aortic valve regurgitation, aortic valve stenosis and mitral valve regurgitation. He has a history of hypertension and hyperlipidemia. He had a TEE in April 2021 that showed an EF of 60-65%, congenitally malformed AV with calcified and fixed right coronary cusp, mild to moderate AS, mild MR and trace TR. He reports he was recently diagnosed with a melanoma. He is stage IIC is now on Opdivo. He denies chest pain, shortness of breath, PND, orthopnea, pedal edema, palpitations, and syncope. He has gained 18 lb while he has been less active due to the melanoma.
Review of Systems	Patient reports easy bleeding tendency but reports no bruising and no excessive bleeding. He reports no fever, no recent weight gain, no recent weight loss, no weakness, and no fatigue. He reports no transient or complete visual loss/blindness. He reports no loss of hearing or tinnitus. He reports no nosebleeds and no sinus problems. He reports no bleeding gums. He reports no shortness of breath, no coughing up blood, and no snoring. He reports no abdominal pain, not vomiting blood, no dyspepsia/indigestion, no blood in stool or black/tarry stools, and no difficulty swallowing /dysphagia. He reports no hematuria/blood in urine and no erectile dysfunction. He reports no muscle aches or cramps, no muscle weakness, and no arthralgias/joint pain. He reports no right lower leg pain with walking (no claudication). He reports no left lower leg pain with walking (no claudication). He reports no rashes. He reports no loss of consciousness, no focal weakness, no frequent or severe headaches, and normal gait/no unsteadiness or walking difficulty. He reports no depression,

	no sleep disturbances, no anxiety, and no sleep disturbances: excessive sleepiness during the day (daytime somnolence). He reports no unusual sweating.

Family History	Reviewed Family History pt is adopted, but states that some relatives died due to cardiac events per ancestry website													
Past Medical History	Past Medical History not reviewed (last reviewed 04/15/2021) Gout: Y Heart Murmur: Y Hyperlipidemia: Y Hypertension: Y													
Past Surgical History	Reviewed Surgical History - Other Non-Cardiac Surgery - hernia repair - Cholecystectomy - 03/21/2023 - St. Frances. Columbia, GA. - Skin Cancer Removal - 01/27/2023 - UAB. melanoma - TEE - 04/29/2021 - EF 60-65%, congenitally malformed AV w/ calcified and fixed R coronary cusp, mild-mod AS, mild MR, trace TR - Echocardiogram - 03/24/2021 - EF 65-70%, mild cLVH, mild LAE, mild-mod MAC/MR, mild-mod AI													
Results/Interpretations	None recorded													
Physical Exam	Constitutional: General Appearance: well-developed, appears stated age, and obese . Level of Distress: comfortable. CSHA Clinical Frailty Assessment 2: Well appearing. Psychiatric: Mental Status: normal affect, concentration, mood, and attention span and alert, cooperative, and cognition intact. Orientation: oriented to time, place, and person. HEENT: Head: normocephalic and atraumatic. Ears: normal hearing. Nose: no lesions on external nose. Eyes: Lids and Conjunctivae: no discharge, pallor, xanthelasma, or arcus. Pupils: PERRLA and EOM intact. Neck: Neck: supple, trachea midline, no masses, and normal ROM. Carotid Arteries: no bruits or thrills and bilateral normal upstroke. Jugular Veins: normal jugular venous pressure.													

Lungs: Respiratory Effort: unlabored. Chest Exam: no thoracic deformity or chest wall tenderness and normal curvature. Auscultation: no wheezing, rales, or rhonchi and clear bilaterally.

Cardiovascular: Precordial Exam: no heaves or precordial thrills and non displaced focal PMI. Rate And Rhythm: regular rate and rhythm. Heart Sounds: no rub, gallop, or click and normal S1 and physiologically split S2. Systolic Murmur: **grade 2/6 at the apex**. Diastolic Murmur: not heard. Extremities: no cyanosis, edema, clubbing, or peripheral signs of emboli and normal temperature and capillary refill.

Peripheral Pulses: Pulses of Chest and Abdomen: no palpable aortic enlargement or audible aortic bruit. Posterior Tibialis Pulse normal. Dorsalis Pedis Pulse: normal.

Abdomen: Inspection and Palpation: non distended or tender and soft and no masses.

Musculoskeletal: Inspection: no joint tenderness or swelling, no erythema, and normal ROM.

Neurologic: Gait: normal gait. Motor: normal strength and tone. Neurological: speech fluent and cranial nerves II-XII grossly intact.

Skin: Inspection and Palpation: skin intact and warm and dry.

Accompanied by wife, who assists with history

Assessment and Plan**1. Aortic valve stenosis -**

no more than moderate. He will be monitored closely
I35.0: Nonrheumatic aortic (valve) stenosis

2. Aortic valve regurgitation -

moderate by TEE. Again will monitor closely. EKG shows atrial rhythm at 65 with first-degree AV block.
I35.1: Nonrheumatic aortic (valve) insufficiency
• ELECTROCARDIOGRAM

3. Bicuspid aortic valve -

see above

Q23.1: Congenital insufficiency of aortic valve

4. Mitral valve regurgitation -

mild

I34.0: Nonrheumatic mitral (valve) insufficiency

5. Essential hypertension -

Fairly well controlled on losartan

I10: Essential (primary) hypertension

- HIGH BLOOD PRESSURE: CARE INSTRUCTIONS

6. Body mass index 30+ - obesity -

we discussed the need to lose weight

Z68.36: Body mass index [BMI] 36.0-36.9, adult

- BODY MASS INDEX: CARE INSTRUCTIONS
- LEARNING ABOUT HEALTHY WEIGHT

7. Malignant melanoma -

recent surgery. Now on Opdivo

C43.9: Malignant melanoma of skin, unspecified

Patient Instructions

- Patient has been advised to continue all medications as listed above. I have not made any changes today.
- Instructed patient on the benefits of weight loss for better health. If you develop shortness of breath, swelling, chest pain, or passing out, please call ASAP

Discussion Notes

- I have discussed with patient the importance of regular exercise and recommended starting or continuing a regular exercise program for good health.

Return to Office

- to see Wynne Crawford MD for Return MD at MCA East on or around 10/30/2024
