PATIENT: COX, KELLY **DOB:** 01/16/1987 **Gender:** FEMALE **MRN:** 300 **AGE:** 35 Years

VISIT TYPE: Lab Only

CHIEF COMPLAINT: erythema to arm after COVID 19 vaccine

HISTORY OF PRESENT ILLNESS: 35 year old female presents to clinic with complaints of erythema to right arm starting today. She claims she received her COVID 19 booster vaccine on Friday, October 14, 2022. She denies pain, tenderness, numbness, tingling. Area is red and measures L:3.5cm x W:6cm, there is no induration, drainage, or open area noted. Area appears to just be local site reaction from vaccination and patient is informed (by NP) that she can take Benadryl otc at night for next few nights and apply steroid cream. Patient voices understanding and denies questions or concerns at this time. Pt reassured that it is a local site reaction. Follow up if no improvement or worsening symptoms.

ALLERGIES: No Known Drug Allergies

MEDICATIONS:

Flonase Allergy Relief 50 mcg/actuation nasal spray,suspension (SPRAY 1 - 2 SPRAYS (50 - 100 MCG) IN EACH NOSTRIL BY INTRANASAL ROUTE once daily)
