

# Immunization Form

To ensure the health and safety of our campus, immunizations against communicable diseases is extremely important. Vaccination against Measles, Mumps, Rubella (MMR), Tetanus, Diphtheria and Pertussis, and proof of negative Tuberculosis is required of all students entering Auburn Montgomery. This form must be completed and is the preferred document for proof of immunizations and TB testing.

Complete and Return to: Student Health Center  
Attn: Immunizations  
PO Box 244023  
Montgomery, AL 36124  
(334) 244-3281 Fax (334) 244-3396

Name Babar Talha Student Number \_\_\_\_\_  
Address St# 02, House No. 822, Sec. 10/7 Islamabad Pakistan 44000  
City Islamabad State Pakistan Zip Code 44000  
Phone Number 03355538861 Cell Phone Number 03355538861 E-mail Address mtalha.babar123456@gmail.com Date of Birth 30/11/1998

## REQUIRED IMMUNIZATIONS

Tuberculosis Screening (within 6 months prior to semester student is to begin at AUM.)  
Date Given 11/12/17 (Date of reading, within 48 to 72 hours of date given) TB skin test (PPD) 19 / 12 / 2017

Results: Positive \_\_\_\_\_ mm Negative 5 mm

If positive, you must attach a radiology report from chest X-ray and documentation of treatment.

Tetanus, Diphtheria, Pertussis Vaccine (preferred). Students without previous documentation of a TDaP vaccine should have one dose prior to entrance based on current guidelines. Other students should be current to maintain their status throughout their entire academic career.

Date of TDaP vaccine: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
or Td \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_ (within the last 5 years)

Measles, Mumps, Rubella (MMR)

Auburn Montgomery University requires that all students born after 1956 must have had 2 doses of a measles containing vaccine (MMR) prior to registration. One dose must have been after 1980. Lab antibody titers (IgG) for Measles, Mumps and Rubella are acceptable. Please attach documentation to the back of the form. (Lab report is attached.)

Date of First Dose \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_ Date of Second Dose \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_

OPTIONAL IMMUNIZATIONS (These immunizations are not required by the university but are recommended by the American College Health Association.)

Hepatitis B: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
1st 2nd 3rd

Varicella (Chickenpox) Vaccine: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
1st 2nd

Meningococcal (meningitis) Vaccine: \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_ (MCV4 preferred)  
1st 2nd

I certify that the above dates and vaccinations are true.

### IMMUNOLOGY

17-Dec-2017

Mantoux Test

Negative  
< 1

mm

Negative: 1 - 4  
Borderline: 5 - 9  
Positive:  $\geq$  10

#### Interpretation

Area of induration (in mm):

- 1 - 4 : Negative
- 5 - 9 :

- Healthy individuals : Borderline
- Close contacts of active TB cases : Positive
- HIV positive or injecting drug users : Positive

- $\geq$  10 All individuals : Positive

#### COMMENTS:

- Positive Mantoux skin test establishes exposure to TB in individuals who have been infected at some time with M. tuberculosis.
- Does not distinguish between current disease and past infection.
- False positive reaction occurs in:
  - Infection with non-tuberculous mycobacteria
  - BCG vaccination. BCG effect may last for one to several years.

#### Boosted Tuberculin Reaction

Boosted tuberculin reaction occurs when the initial test is negative and PPD injection is repeated after a week or so. This effect may also persist for at least 1 year.
