Date: 12/11/24

PATIENT: GRAY, DEVONNA **DOB:** 03/25/1961 **Gender:** FEMALE **MRN:** 4959 **AGE:** 63 Years

VISIT TYPE: Office Visit Established

CHIEF COMPLAINT: ER follow up- exhaustion/fatigue with elevated blood pressure and headache

HISTORY OF PRESENT ILLNESS: Ms. Gray is a 63 yo female here today for ER follow up. She reports intermittent midsternal chest pain since the week of Thanksgiving. Associated with fatigue and shortness of breath. She was seen at BMCE ER Sunday. Troponin was negative and labs were normal except anemia. She was discharged home with a referral to cardiology. She does not have that appt yet.

She comes in today with elevated BP. She reports the ER took her off the lisinopril and restarted HCTZ because she did not like the way the lisinopril made her feel. Her last dose of HCTZ was last night. Associated with headache.

She also c/o midsternal intermittent chest pain, fatigue and shortness of breath. Associated with nausea and dizziness. Her daughter is present and she reports she was having jaw pain last night and her heart rate has been low.

VITALS: BP: 194/78 **Position:** SITTING **Pulse:** 45 **BP2:** 191/90 **Position2:** SITTING **Pulse2:** 45 **BP3:** 182/78
Position3: LAYING **Pulse3:** 57; **Temp:** 97.2; **Resp:** 16; **Wt:** 205.6 lbs.; **Pulse Oximetry:** 99%

ALLERGIES: No Known Drug Allergies

MEDICATIONS:

cyclobenzaprine 5 mg tablet (TAKE 1 TABLET (5 MG) BY ORAL ROUTE 3 TIMES PER DAY AS NEEDED FOR MUSCLE SPASMS.)

PATIENT: GRAY, DEVONNA **DOB:** 03/25/1961 **Gender:** FEMALE **MRN:** 4959 **AGE:** 63 Years

PHYSICAL EXAMINATION:

GENERAL: GENERAL: No apparent distress noted; Well developed; Pleasant.

HEENT: Head- normocephalic; atraumatic. Eyes- sclera white, conjunctiva pink, EOMI. Ears- tympanic membranes clear. Ear canals are patent. Nose- septum- midline; No maxillary or frontal sinus tenderness. Throat- pink without exudates. No anterior or posterior cervical nodes palpated; No palpable thyroid abnormality or enlargement.

CARDIOVASCULAR: S1 S2; sinus brady w/ frequent PVCs; No systolic ejection murmurs noted; No carotid bruits noted. No peripheral edema bilateral lower extremities.

RESPIRATORY: Breath sounds equal and unlabored. Clear to auscultation bilaterally without wheezes, rales, or rhonchi.

MUSCULOSKELETAL: Normal range of movement x 4 extremities; 2+ DP and PT pulses bilaterally

INTEGUMENTARY: Warm, dry, intact. No lesions or rash noted.

NEUROLOGIC: Alert and Oriented X3. CN II-XII intact. Sensation intact. Speech clear. Ambulates with steady gait.

PSYCHIATRIC: Appropriate mood and affect.

ORDERS:

EKG (1 unit(s)): Office Procedure

ASSESSMENT:

R07.9 - CHEST PAIN, UNSPECIFIED (PRIMARY)

R00.1 - Bradycardia, unspecified

R06.00 - Dyspnea, unspecified

I10 - Essential (primary) hypertension

PLAN:

EKG- sinus brady at 58 bpm w/ frequent PVCs, but no ischemic changes. Requested records from BMCE from Sunday's visit. Her BP is elevated today. She was given clonidine 0.2mg PO once in office. Recheck BP one hour later was 187/78. She became dizzy in the office and was having nausea. EMS was called. When EMS arrived, she declined transport due to not having any insurance. Her daughter chose to drive her despite my recommendation to have EMS transport. She was assisted out to her car by wheelchair.

Of note, I spoke with Darbi, NP at MCA. They will call her to schedule a follow up.

Advised Mrs. Gray on the importance of scheduling a colonoscopy (anemia) and updated mammogram (she reports breast pain intermittently) as well once she is cleared from cardiology standpoint and her insurance is reinstated. She agreed.

Referral: MCA, Montgomery Cardiovascular Associates (Cardiology)
