CDM description

MR Lumbar spine MRI w/o contrast

Reason For Exam

(MR Lumbar spine MRI w/o contrast) LBP

FINDINGS

GRAY, DEVONNA

EXAM:

MR LUMBAR SPINE MRI W/O CONTRAST

HISTORY:

LBP

COMPARISON:

No comparisons

TECHNIQUE:

Sagittal T1, T2, STIR, and axial T1 and T2 imaging was performed.

FINDINGS:

Vertebral bodies: Intact, no fracture. Degenerative marrow changes noted.

Conus: Normal location, signal and morphology.

Evaluation by level:

L1-2: Mild bulge and spurring and facet arthropathy no significant foraminal canal narrowing.

L2-3: Mild spurring, no significant foraminal canal narrowing.

Name: GRAY, DEVONNA

Magnetic Resonance Imaging

FINDINGS

L3-4: Disc space narrowing spurring, asymmetric right-sided facet arthropathy and moderate right foraminal narrowing.

L4-5: Mild bulge, moderate facet arthropathy, no significant foraminal canal narrowing.

L5-S1: Bulge and spurring moderate facet arthropathy grade 1 anterolisthesis, moderate left foraminal narrowing and mild to moderate right foraminal narrowing.

Additional findings:
None significant.

IMPRESSION:

Multilevel degenerative change, most notable:

L3-4 asymmetric right foraminal narrowing

L5-S1 left greater than right foraminal narrowing.
