

PROCEDURE: Incision and Drainage Right groin cutaneous abscess

Verbal informed consent given from Mr. Bronson and his wife who is at bedside. Risk and benefits discussed. He would like to proceed with the procedure.

Right groin area cleansed with normal saline and alcohol prep. Area was numbed with 1% lido w/o epi approximately 2.5 ml administered subcutaneous. Once area was numbed, a small incision was placed using a #11 blade. Moderate amount of drainage was expressed using manual pressure. Area was cleansed again with hibicleanse and 1/4 in iodoform gauze was placed. Gauze dressing applied. No complications.
