 Imitrex 20 mg/inh nasal spray, 1 Spray, NASAL, As Directed, PRN, 11 refills
 Zofran 8 mg oral tablet, 8 mg= 1 Tab, PO, Q8H, PRN, 3 refills

History of Present Illness

Mr. Bronson is a 16 YO AAM who presents for further evaluation of migraines. He has been having migraines since age 5. He has no family hx of migraines. He did have a head injury around age 3 - a TV fell on his head. He did not get knocked out. He had an MRI Brain about 2 years ago - this was done in New York - they were told this was normal. He states he may have 3 - 4 migraine days per month. The most he may have is about 5 - 6 per month. He states he often awakens with a migraine. He typically has associated nausea with his headache pain. There have been times he has had associated vomiting as well. His migraine pain is typically over his temples and above his right eye. He rates the pain of his migraines at a 6/10 on a pain scale. He describes the pain as aching and pressure-like. He is unsure what his migraine triggers are, but thinks weather change may be a trigger. He denies any associated photophobia or phonophobia. He does not have any visual aura, scintillating scotoma, or associated neck pain or tension. Sleep usually resolves his migraines. They may last a few hours. He has tried ibuprofen, Excedrin and Maxalt without relief. He has a past hx of asthma - he follows with his PCP, Lindsey Barton, CRNP for this and his other primary health care needs.

Allergies

No Known Medication Allergies

Social History

Alcohol

Alcohol Use: No.

Substance Abuse

Drug Use: No.

Tobacco

Tobacco Use: Never (less than 100 in lifetime). Non-Smoking Literature: Non-smoker.

T(Oral): 98.4 DegF(05/05/22 15:45:00)
HR(Monitored): 82 bpm(05/05/22 15:45:00)
BP: 130/80 mmHg(05/05/22 15:45:00)
SPO2: 98 %(05/05/22 15:45:00)

Height: 70 in(05/05/22 15:45:00)
Weight: 132.6 kg(05/05/22 15:45:00)
BMI: 42 (05/05/22 15:45:00)

GENERAL: Mr. Bronson is a very pleasant 16 YO AAM. He is calm and cooperative, appears in no distress. Pt is dressed appropriately, appears well-hydrated and well-nourished. He is accompanied by his mother.

HEAD: Normocephalic, atraumatic.

SKIN: Skin is warm, dry, and intact. Color is race appropriate. MM are pink and moist.

EYES: PERRL. EOMI. No nystagmus. Sclerae are white. Visual fields are full.

NECK: Neck is supple. Neck is with good ROM.

NEURO: Pt is AA&Ox3, affect is appropriate, speech is clear, face is symmetrical. Gait and station are unremarkable. Muscle tone and strength are intact.

PSYCH: Pt does not currently appear overly anxious or depressed. Thought processes appear intact and well organized. Memory is good. Pt answers questions appropriately and correctly.

MSK/EXTREMITIES: All extremities are with good ROM. All joints with good ROM and no swelling or deformity. No swelling or edema in any extremity. No clubbing or cyanosis present. Muscle tone and strength are intact throughout.

Assessment/Plan

1. Migraine without aura

Uncontrolled - Rx Imitrex NS since he often awakens with a migraine already present and since he has associated nausea. Instructions given, possible SEs reviewed. Will obtain MRI Brain without contrast for complete evaluation. Instructed pt to continue keeping a migraine diary. I will give him literature for his review on migraines.

2. Nausea

Associated with migraines. Rx Zofran 8 mg as needed. Instructions given, possible SEs reviewed. I will F/u with him in 3 months or sooner if needed. I have discussed this and the above plan with the pt. Pt states understanding and is in agreement with this plan. I have asked pt to call us with any questions or problems.

Orders:

ondansetron, 8 mg 1 Tab, PO, Q8H, PRN PRN: NAUSEA/VOMITING, # 30 Tab, 3 Refill(s), Pharmacy: Walmart Pharmacy 938, 1 Tab PO Q8H, PRN: NAUSEA/VOMITING, 70, in, 05/05/22 15:45:00 CDT, CLINICALHEIGHT, 132.6, kg, 05/05/22 15:45:00 CDT, CLINICALWEIGHT
