CDM description

US Scrotum/Doppler

Reason For Exam

(US Scrotum/Doppler) N50.811Right testicular pain; N50.811Right testicular pain

FINDINGS

FAIN, JORDAN T

EXAM:

US SCROTUM/DOPPLER

HISTORY:

N50.811Right testicular pain.

COMPARISON:

US Scrotum/Testicular dated 11/20/2007; CT Abd/Pelvis without contrast dated 1/18/2011

TECHNIQUE:

Grayscale sonographic evaluation of the bilateral scrotum and testes performed by the sonographer with color and spectral Doppler.

FINDINGS:

Both testes measure 5 x 3 x 2 cm and are normal in echogenicity without focal lesion. There is arterial flow in both kidneys. Right and left epididymis appear normal apart from a tiny left epididymal cyst. Small bilateral hydroceles.

There appears to be right varicocele, and borderline left varicocele.

IMPRESSION:

Bilateral varicocele, right more so than left. Trace hydroceles.
