Provider reviewed on Oct 27, 2022.

A complete review of systems was performed and was notable for rash.

No Problems With Bleeding, No Problems With Healing, No Problems With Scarring (hypertrophic Or Keloid), No Immunosuppression, No Hay Fever, No Chest Pain, No Fever

Chief Complaint: Rash**HPI:** This is a 28 year old male who is a new patient who is being seen for a chief complaint of rash, located on the back of scalp/neck and beard area. Rash has been intermittent for several years. The rash is itchy, red and bumpy. Previously treated with antibiotics and ketoconazole shampoo x 1 month which have helped some. Never has had a biopsy. No fam hx of similar rash.**Historical Summary:**

Referred by Robin Blackwell, NP

Exam:

An examination was performed including the scalp (including hair inspection), head (including face), inspection of conjunctivae and lids, lips (but not teeth and gums), neck, chest, abdomen, back, right upper extremity, left upper extremity, right lower extremity, left lower extremity, genitalia, groin, buttocks, and Inspection and palpation of digits and nails.

Patient Skin Type is Type .

General Appearance of the patient is well developed and well nourished.

Orientation: alert and oriented x 3.

Mood and affect: pleasant.

Findings in the above examined areas were normal with the exception of the following exam descriptions below:

- folliculitis on the hair.

Impression/Plan:

1. Folliculitis
(L02.92)

Plan: Prescription.doxycycline hyclate 100 mg capsule PO
Sig: Take one capsule twice daily with food
Quantity: 60 Capsule Refills: 1Diflucan 150 mg tablet PO
Sig: Take 1 tablet once a week
Quantity: 4 Tablet**Plan: Prescription Medication Management.**Begin the following treatments: Doxycycline BID
Diflucan once a week.**Plan: Counseling.**

I counseled the patient regarding the following:

Skin care: Patient instructed to apply antibacterial soap and Hibiclens in the shower.

Expectations: Folliculitis is an infection of the hair follicle that can persist for several weeks.

Contact office if: Folliculitis fails to improve despite several weeks of treatment.

I recommended the following:
Cleansers

2. Seborrheic Dermatitis
(L21.8)

Or Chills, No Night Sweats, No
Unintentional Weight Loss, No
Thyroid Problems, No Sore
Throat, No Blurry Vision, No
Abdominal Pain, No Bloody
Stool, No Bloody Urine, No Joint
Aches, No Muscle Weakness,
No Neck Stiffness, No
Headaches, No Seizures, No
Shortness Of Breath, No
Wheezing, No Anxiety, And No
Depression.

Scaly**Plan: Prescription.**

ketoconazole 2 % shampoo TP

Sig: Apply to scalp twice a week; lather and let sit 3 minutes before rinsing. Follow up with conditioner

Quantity: 120 Milliliter Refills: 6

fluocinonide 0.05 % topical solution TP

Sig: Apply 3-4 drops to scalp and massage every other evening

Quantity: 60 Milliliter Refills: 3

Plan: Counseling.

I counseled the patient regarding the following:

Skin care: Emollients, shampoos with tar, selenium or zinc pyrithione can improve seborrheic dermatitis.

Expectations: Seborrheic Dermatitis is chronic in nature with periods of remissions and flares. Flares can be triggered by stress.

Contact office if: Seborrheic dermatitis worsens, or fails to improve despite several months of treatment.

I recommended the following:

Moisturizers

Shampoos

Topical Steroids

Plan: Prescription Medication Management.

Begin the following treatments: Ketoconazole shampoo

Fluocinonide 0.05% solution.

3. MIPS**Plan: MIPS Quality.**

Quality 226 (Tobacco Use Screening and Cessation Intervention): Patient screened for tobacco use and is an ex/non-smoker

Quality 431 (Unhealthy Alcohol Use Screening): Patient not identified as an unhealthy alcohol user when screened for unhealthy alcohol use using a systematic screening method

Quality 130 (Documentation of Current Medications in the Medical Record): Current Medications Documented

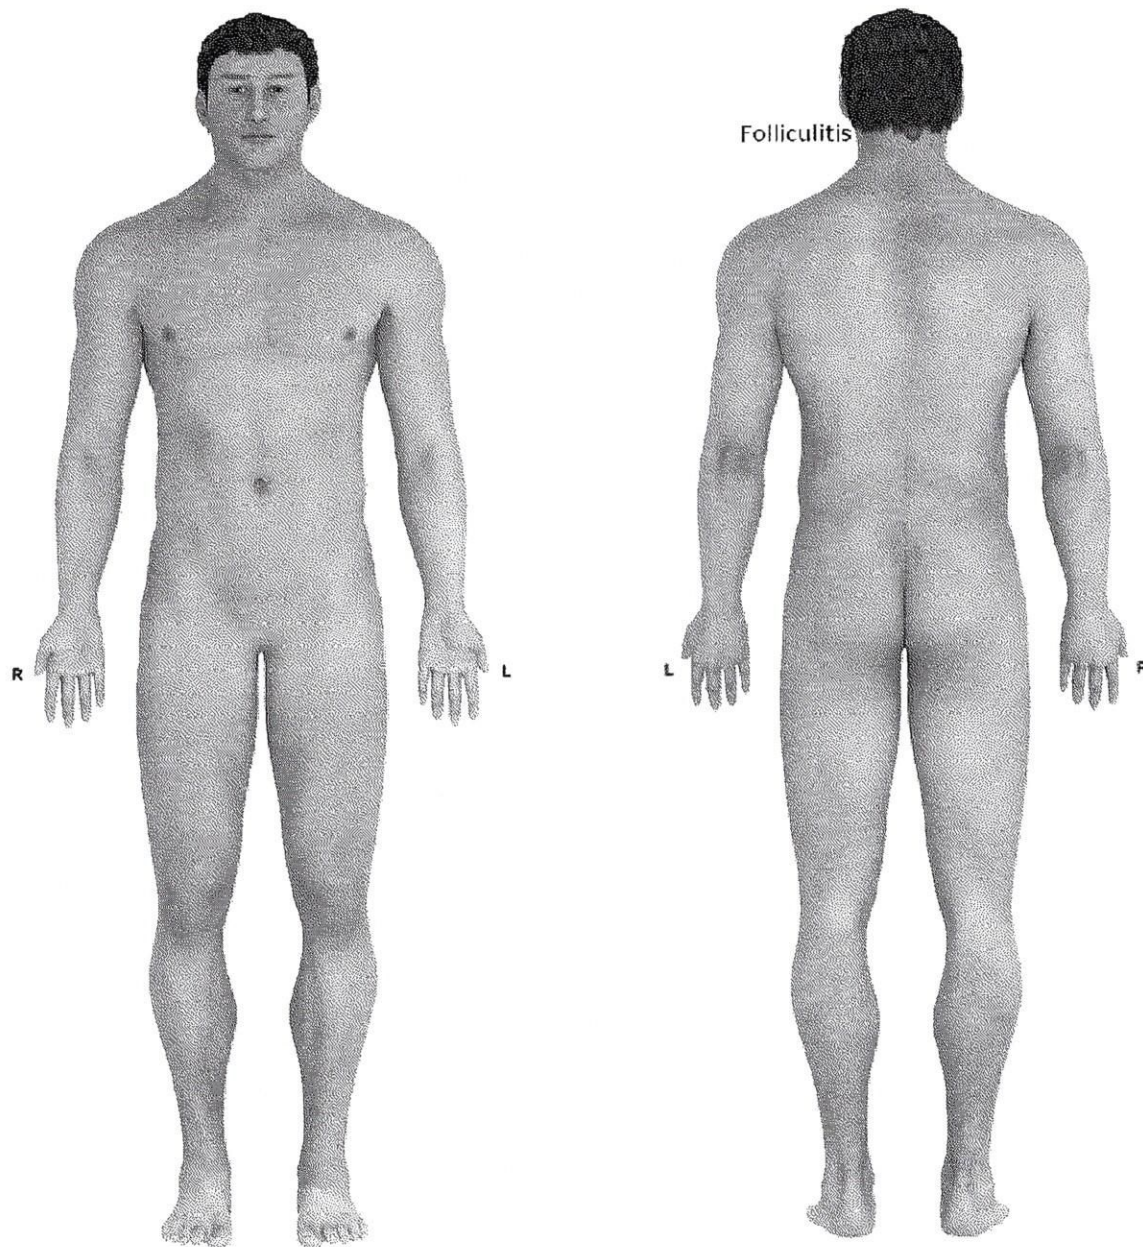

Follow up in 2 months. Other Instructions: Bx scalp if no improvement**Staff:**
