Encounter Review - Office Visit/KKR

Tuesday, September 5, 2023 at 08:35 AM, by Kelli K. Riddle PA
7260 Halcyon Summit Drive, Montgomery, AL 36117-7047 • (334) 277-3332

Cynthia S. Baker
1120 Felton Lane
Auburn, AL 36830

Patient ID: 325194
Incident: office visit

Gender: Female
Marital Status: Widowed

Date of Birth: 01/04/1965
Age: 58

Employment Status: Employed

PROBLEMS LIST

No chronic health problems have been listed.

CHIEF COMPLAINT

Integumentary
• General skin exam.

REASON FOR VISIT

Constitutional
• This is an established patient with a new complaint.

HISTORY OF PRESENT ILLNESS

Integumentary
• The patient presents with general skin exam.
◦ Quality: There are no additional symptoms.
◦ Timing: Symptoms appear with time.
◦ Modifying factors: There are no modifying factors reported.
◦ Location: the waist up.

PAST, FAMILY, & SOCIAL HISTORY

Social History
• Tobacco products: never smoker.
• Patient's history: the patient gave own history.

Past History
• Medication allergies: the patient denies having medication allergies.
• Skin cancer / disease: the patient denies ever having been diagnosed with skin cancer and the patient denies a family history of skin cancer.

EXAMINATION

Constitutional
• The patient is a 58 year old female.
• The patient's general mood is normal.
• The patient's general appearance is alert, seems well developed and well nourished, is healthy, exhibits good hygiene, exhibits no distress, and is normal.

Integumentary
• Inspection of the skin and subcutaneous tissue revealed normal coloring, temperature, and turgor.
• Inspection and palpation of the skin, unless otherwise noted, reveals normally expected variation of color, texture, and turgor in the following areas: the neck, the head including the face, eyelids, conjunctivae and lips, the chest, the back, the abdomen, the right

upper extremity, and the left upper extremity.

- Inspection of the hair, unless otherwise noted, reveals normally expected variation of color, texture, and pattern in the following areas: the face, the chest, the scalp, and the eyebrows.

09/05/2023	L72.0	Epidermal cyst
09/05/2023	I78.1	Nevus, non-neoplastic
09/05/2023	L82.1	Other seborrheic keratosis
09/05/2023	L91.8	Other hypertrophic disorders of the skin

PROBLEMS ADDRESSED AND TREATMENT

Problems Addressed

- Hypertension.
- Lentigines (L81.4).
- Milia.
- Photodamage (L57.8). Chronic. This condition is caused by excessive sun damage.
- Telangiectasia (I78.1).
- Seborrheic keratosis (L82.1). Bilateral lower leg. Bilateral feet. Reassurance. Handout given.
- Skin tag (L91.8).

Treatment Plans

- I asked and performed questions for the HPI today. My scribe entered patient's answers to my questions. I have reviewed the chart.
- I, Kelli Riddle, PA-C, asked and performed questions for the HPI today. My scribe entered patient's answers to my questions. Kelli Riddle, PA-C, and Mark Herron, MD have reviewed the chart.
- Moisturizer prescribed to patient. Advised patient of importance of applying moisturizer.
- Sunscreen prescribed as part of management for photodamage. Instructed patient regarding proper application of sunscreen.
- Dermoscopy with the DermLite DL100 to study characteristics of individual lesions.
- I have discussed careful monitoring of moles and return to clinic for suspicious spots.
- I discussed treatment with patient.
- I reviewed in detail the risks and side effects of today's treatment. The patient is well informed and has good understanding of the options.
- I have mailed a copy to the referring physician.
- Handout was given to the patient.

MEDICATION ALLERGIES

No data of this type has been entered.

CURRENT MEDICATIONS

No data of this type has been entered.
