HPI

HISTORY OF PRESENT ILLNESS: Mr. Murphy is a 42-year-old white male referred for treatment of a right UPJ calculus. He has been having intermittent right flank pain but he is having no pain currently. He has had no nausea, vomiting, fever, chills, or shakes.

ROS

Patient reports **abdominal pain** but reports no nausea, no vomiting, normal appetite, no constipation, no diarrhea, no vomiting blood, no dyspepsia, no GERD, no hematochezia, and no melena. He reports **dry skin** but reports no abnormal mole, no jaundice, no rashes, and no laceration. He reports **sinus pressure** but reports no runny nose, no itching, no hives, and no frequent sneezing. He reports no fever, no chills, no night sweats, no headaches, no significant weight gain, no significant weight loss, and no exercise intolerance. He reports no dry eyes, no vision change, and no irritation. He reports no difficulty hearing and no ear pain. He reports no frequent nosebleeds, no nose problems, and no sinus problems. He reports no sore throat, no bleeding gums, no snoring, no dry mouth, no mouth ulcers, no oral abnormalities, and no teeth problems. He reports no chest pain, no arm pain on exertion, no shortness of breath when walking, no shortness of breath when lying down, no palpitations, no known heart murmur, and no edema. He reports no cough, no wheezing, no shortness of breath, no coughing up blood, and no sleep apnea. He reports no incontinence, no difficulty urinating, no hematuria, no increased frequency, no dysuria, no rashes, and no lesions/ulcerations. He reports no muscle aches, no muscle weakness, no arthralgias/joint pain, no back pain, and no swelling in the extremities. He reports no loss of consciousness, no weakness, no numbness, no seizures, no dizziness, and no headaches. He reports no depression, no anxiety, no sleep disturbances, feeling safe in a relationship, and no alcohol abuse. He reports no fatigue.

ROS as noted in the HPI

Physical Exam

Well-developed well-nourished male in no acute distress.
Neck-2+ carotid pulses without bruit.
Heart-regular rate and rhythm without murmurs, rubs or gallops.
Lungs-bilateral breath sounds clear to auscultation.
Back-no CVA or spinal tenderness.
Abdomen- soft non-distended, non-tender, positive bowel sounds.
Extremities-no clubbing cyanosis or edema.

LABS: Urinalysis reveals trace blood and is otherwise negative.**IMAGING:** I reviewed his CT films and report with him. He has a 1 cm stone in the right renal pelvis. The skin to stone distance is 12.8 cm and the stone density is 993 Hounsfield units.

Assessment / Plan

IMPRESSION:

1. 1 cm right renal pelvic calculus.

PLAN: We discussed options of cystoscopy with stent placement and shock wave lithotripsy versus flexible ureterorenoscopy with a vacuum suction catheter and laser lithotripsy and stent placement. We discussed the pros and cons of both treatments. He wants to discuss these options with his wife and then call back to schedule the procedure. He is leaning towards ureteroscopy and laser lithotripsy with vacuum extraction of fragments. We will start him on suppressive antibiotics with Septra DS ½ tablet p.o. b.i.d. after his surgery. I gave him a ten day supply and I gave him Norco 5.0/325 mg with 12 dispensed and no refills also for postoperative use.

1. Lower urinary tract symptoms

R39.9: Unspecified symptoms and signs involving the genitourinary system

• URINALYSIS, DIPSTICK

Urine Collection Type: Voided
