IMMUNIZATION RECORD

Patient Name Zekairya D. Lawery Birthdate 11-26-99

- I verify that my child has not been ill nor had a temperature over 100.4 in the past 24 hours except for a minor cold.
- I have read the information booklet concerning the diseases and risks of the vaccine to be given to my child. I have been given the opportunity to ask questions, and I have had these questions answered to my satisfaction. I understand the benefits and risks of these vaccines and believe that the benefits far outweigh the risks and I would like for my child to receive the vaccine as recommended by my pediatrician. I am authorized to make this request for the person named above.

DOB: 11/26/1999
Age: 16

**#00000MA20160005722 - MA US BREAST COMPLETE BILAT
ULTRASOUND OF BOTH BREASTS: 2/9/2016**

COMPARISON:

No prior exams were available for comparison.

Clinical history: Bilateral breast masses

Technique:

Real-time ultrasound of both breasts was performed.

FINDINGS:

Transverse and longitudinal images were made throughout both breasts. There is no sonographic abnormality. Palpable areas are consistent with fibrocystic tissue.

IMPRESSION:

There is no sonographic evidence of malignancy or other significant disease process

RECOMMENDATION:

Follow-up with ACR guidelines.

The patient has received a written notification of results in lay terms.

Cynthia O. Lorino M.D.
