Prepared for LINDSEY BARTON

A recent review of pharmacy and/or medical claims has identified the following drug therapy opportunities for your patient.

Bottom line: Non-adherent to cholesterol medication

Action requested: Evaluate drug refill patterns

The Adherence cholesterol program identifies patients whose proportion of days covered (PDC) is less than 80%. This patient's PDC is 78% over the previous 365 days. Common reasons for non-adherence may include: side effects, affordability, or changes in the drug regimen. Please provide a new prescription if the regimen has changed, and/or discuss the importance of adherence and ways to address barriers with your patient.

Medication History: For a complete listing of the pharmacy claims associated with this drug therapy opportunity, please see Drug Therapy Opportunity **Adh Chol** on the Supplemental Information page(s).

Due to the potential for claim submission errors, please validate the above information. This information is not intended to replace your clinical judgment and is being provided to you for purposes of quality, care coordination, and other health care operations as permitted by the Health Insurance Portability and Accountability Act (HIPAA). Only a physician in direct consultation with the patient may determine whether or not to pursue potential drug therapy opportunities. If you have received a profile for a patient for whom you are not the prescriber and/or have not provided care, please complete the form found on the back of this letter and fax with a copy of this letter to 1-877-869-8127. Please shred or otherwise destroy this document to protect patient confidentiality.
