Date: 06/14/24

PATIENT: DRAPER, SHAUN **DOB:** 12/29/1987 **Gender:** MALE **MRN:** 5372 **AGE:** 36 Years

VISIT TYPE: Lab Only

CHIEF COMPLAINT: wound care

HISTORY OF PRESENT ILLNESS: 36 year old male presents to clinic for wound care due to the left anterior ankle. He sustained a puncture wound to the area over the weekend while working in his yard. He claims he went to the local ER, received wound care and a Tdap vaccine at that time and is now doing wound care twice daily. He has been seen by his PCP (Jackson Clinic) earlier this week and has another follow up on Monday the 24th.

At this time a gauze dressing is removed. Dressing is saturated with serosang. drainage. Wound measures L:2.5cm x W:2.0cm x D: 0.2cm. The wound bed consists of 25% granulation tissue and 75% necrotic slough (yellow in color). He is educated on the need to have the slough removed (by sharp debridement or enzymatic removal with Santyl) for wound closure and advised to see his PCP. He voices understanding. There is no purulent drainage, erythema, odor, or increased pain at the wound site. Patient is noted to have slight lower extremity edema to bilateral lower extremities but he has been working outside all morning and states this is not uncommon for him. Pedal pulses are palpable. Wound is cleaned with spray wound cleanser, area is patted dry, then triple antibiotic ointment is applied, and a dry gauze dressing is used to cover area. Patient reports his fiancée performs the wound care normally at home, but she will not be able to change the dressing until 4pm this afternoon. He is educated on the signs/symptoms of infection and instructed to seek medical care if any of those signs appear.

VITALS: BP: 148/95 **Site:** LEFT ARM **Position:** SITTING **Pulse:** 96; **Temp:** 98.3; **Resp:** 18; **Ht:** 70 in.; **Wt:** 356.4 lbs.;
BMI: 51.13; **Pulse Oximetry:** 95%

ALLERGIES: No Known Drug Allergies

MEDICATIONS:

No Known Medications

ASSESSMENT:

Z51.89 - Encounter for other specified aftercare (PRIMARY)

PLAN:

Follow up with PCP as scheduled.
