#00000MA20230003189 - MA US BREAST LIMITED BILAT

LIMITED ULTRASOUND OF BOTH BREASTS: 1/20/2023

CLINICAL: Breast cancer status post bilateral mastectomy. Patient complains of bilateral breast pain from tissue expanders.

COMPARISONS: No prior exams were available for comparison.

TECHNIQUE: Ultrasound of both breasts was performed. Gray scale images of the real-time examination were reviewed.

FINDINGS: Targeted ultrasound performed with attention to the areas of concern along the upper outer margin of the right tissue expander and the upper outer and lower outer margin of the left tissue expander. No cyst, mass, or effusion.

IMPRESSION: ULTRASOUND BENIGN

Targeted ultrasound of the areas of concern demonstrates no significant abnormality adjacent to the tissue expanders.
Clinical follow-up recommended.
There is no sonographic evidence of malignancy.

Teddi H. Berry MD

A handwritten signature in black ink that reads "Teddi Berry".
