**STATUS:** FINAL

| <u>Test Name</u>                                                                                                | <u>Abnormal</u> | <u>Result Value</u> | <u>Unit of Measure</u> | <u>Ref Range</u>                                                             | <u>Status</u> | <u>Producer ID</u> |
|-----------------------------------------------------------------------------------------------------------------|-----------------|---------------------|------------------------|------------------------------------------------------------------------------|---------------|--------------------|
| RUBELLA ANTIBODIES, IGG                                                                                         |                 | 23.00               | index                  | Immune<br>>0.99<br>Non-immune <0.90<br>Equivocal 0.90 - 0.99<br>Immune >0.99 | F             | 01                 |
| MEASLES ANTIBODIES, IGG                                                                                         |                 | >300.0              | AU/mL                  | Immune<br>>16.4<br>Negative <13.5<br>Equivocal 13.5 - 16.4<br>Positive >16.4 | F             | 01                 |
| Presence of antibodies to Rubeola is presumptive evidence of immunity except when acute infection is suspected. |                 |                     |                        |                                                                              |               |                    |
| MUMPS ABS, IGG                                                                                                  |                 | >300.0              | AU/mL                  | Immune<br>>10.9<br>Negative <9.0<br>Equivocal 9.0 - 10.9<br>Positive >10.9   | F             | 01                 |
| A positive result generally indicates past exposure to Mumps virus or previous vaccination.                     |                 |                     |                        |                                                                              |               |                    |
