PATIENT: MARTIN, LORRAINE **DOB:** 02/11/1956 **Gender:** FEMALE **MRN:** 5481 **AGE:** 69 Years

Z23 - ENCOUNTER FOR IMMUNIZATION

PLAN:

Pt would like to space out vaccines, will receive Hepatitis A and MMR today, will return for typhoid, polio, and tetanus. Advised will call once typhoid comes in.

D/w pt enhanced risk for polio and measles in Egypt at this time, also to be mindful that rabies is more prevalent in that area. Advised on water conditions, travellers diarrhea, sun exposure, and other potential inherent risks associated with international travel. Pt verbalized understanding and has been researching independently as well.
