Bottom line: Non-adherent to asthma medication

Action requested: Evaluate drug refill patterns

The Adherence asthma program identifies patients whose proportion of days covered (PDC) is less than 80%. This patient's PDC is 65% over the previous 365 days. Common reasons for non-adherence may include: side effects, affordability, or changes in the drug regimen. Please provide a new prescription if the regimen has changed, and/or discuss the importance of adherence and ways to address barriers with your patient.

The most recent asthma medication claim for which you have been identified as the prescriber is listed below.

Date Filled	Drug Name/Strength	Dispensed Quantity	Days Supply	Pharmacy Name	Pharmacy Phone	Prescriber of Record Name	Prescriber Phone

IMPORTANT WARNING: We identify prescribers based on the National Provider Identifier (NPI) submitted by pharmacies on the prescription drug claims. Due to the potential for claim submission errors, please validate the above information. This information is not intended to replace your clinical judgement and is being provided to you for purposes of quality, care coordination, and other health care operations as permitted by the Health Insurance Portability and Accountability Act (HIPAA). Only a physician in direct consultation with the patient may determine whether to pursue drug therapy opportunities.
